GBK GLOBAL ECOSYSTEM

Future Vision and Practical Roadmap

TOKEN | AI | SWAP | MARKETPLACE | LEARN | AGRI | COMMUNITY

Purpose: explain the long-term GBK ecosystem direction in a simple, useful format.
This is a strategic planning document, not a promise of token price, profit, adoption or future results.

North Star

Build useful products and real communities around GBK.

Core path

HOLD -> USE -> BUILD -> CONNECT -> GROW

GBK Token - a gateway into the ecosystem: hold, use, swap and participate.
GBK Swap - simple wallet-based access to supported GBK trading routes.
GBK AI - AI interfaces for information, tools and ecosystem navigation.
AI Marketplace - ask for a product or service and discover relevant providers.
Learn - multilingual spoken-English and digital-skills learning.
Agri - AI crop guidance, weather, market and agriculture information.
Merchant Network - real businesses create recurring utility and local discovery.
Founder Community - a human network for merchants, users, creators and events.

Long-term principle: utility should grow independently of token trading activity.

2. GBK TOKEN HOLDER JOURNEY

Simple journey: DISCOVER -> BUY -> HOLD -> USE -> LEARN -> SHARE

Holder requirements

1. Hold GBK in a supported BNB Smart Chain wallet.
2. Use supported GBK acquisition and ecosystem routes.
3. Current communication: approximately 0.1% to 0.9% daily token-quantity increase,
subject to protocol rules and applicable processing.
4. 3% to 27% over 30 days is an illustrative token-quantity range, not a guarantee.
5. Some balance changes may take 48-72 hours depending on transaction/network processing.

Important: additional GBK tokens are not guaranteed fiat returns.
Market value can change with price, liquidity, supply and demand.

Security: never share a seed phrase or private key.

3. OFFICIAL GBK CONTRACT

Network: BNB Smart Chain
Token: GBK / GBANK APY
Standard: BEP-20
Decimals: 8

Official GBK contract address

0xdA0638EA374c4c5bF2914E6F4D5B2335dEb8D80D

Always verify the contract address and network before swapping.
Do not rely on copied addresses from unofficial messages.

Use the official GBK applications and published rules as the current source for product availability, fees, rewards and verification requirements.

4. GBK SWAP AND LIQUIDITY STRATEGY

Make the swap experience simple, mobile-friendly and transparent.

Priority

1. Clear token and network selection.
2. Show applicable fees/taxes and slippage before signing.
3. Wallet-controlled transactions; never request private keys.
4. Track successful swaps, unique wallets, liquidity and failed transactions.
5. Build sustainable liquidity rather than artificial volume.

Future opportunity

Evaluate additional chains and cross-chain access only where liquidity, security
and product support are sufficient.

Goal: reliable access and clear user experience, not promises about price.

5. AI MARKETPLACE - ASK FOR ANYTHING

The marketplace can become an everyday utility layer.

Examples

Find an AC repair near me

Book a hotel in Pattaya

Find flights to Dubai

Find a restaurant nearby

I need a website

Find a real-estate agent

I need a spoken-English course
Help with a crop problem

Core flow

ASK -> UNDERSTAND -> DISCOVER -> COMPARE -> CONNECT / BOOK / B

Merchant listings should use ownership/details verification and clear dispute rules.

6. FOUNDER AND MERCHANT GROWTH

Founders create measurable real-world network growth.

Merchant journey

FIND -> INVITE -> SUBMIT -> VERIFY -> PUBLISH -> IMPROVE

Merchant information can include business name, category, service area, contact details, website/social, services, hours, photos and payment options.

Founder membership

Country Founder: $300 / $500 / $1,000
Global Founder: $3,000 / $5,000 / $10,000

Founder membership is community/ecosystem participation, not an investment

product and not a guarantee of income or token appreciation.

Founder holding rule: maintain at least 50% of the verified activation GBK baseline,
subject to the current program rules.

7. LEARN, AGRI AND AI SERVICES

Learn.gbkai.com

Listen -> Speak -> AI feedback -> Practice -> Progress

Focus: multilingual spoken English and digital skills.

Agri.gbkai.com
AI Crop Doctor, crop planning, pest/disease guidance, weather, market information
and government-scheme discovery.

Ask AI and Tools
Practical AI services for questions, explanations, content and everyday tasks.

News
Multilingual news and education with clear separation between information and promotion.

Objective: give users reasons to return even when they are not trading.

8. GLOBAL COMMUNITY AND CONTENT

Content strategy

1. Local-language educational videos.
2. Founder stories and useful ecosystem tutorials.
3. Short videos: how GBK works, how to swap, marketplace examples and product demos.
4. Digital marketing education: ethical SEO, content, video and social skills.
5. Ambassador recognition for useful activity, not fake engagement or spam.
6. Local meetups, online sessions and global community events.

Measure quality, not vanity numbers

active users, repeat usage, verified merchants, completed connections, useful content engagement and support resolution time.

9. 2026-2030 ROADMAP AND TRUST

Phase 1 - Foundation

Stabilize Swap, wallet connection, Founder dashboard, verification and security.

Phase 2 - Utility

Strengthen Marketplace, merchant onboarding, Learn, Agri and AI tools.

Phase 3 - Network

Expand verified merchants, founders, creators and local communities.

Phase 4 - Interoperability

Evaluate additional chains and cross-chain access where appropriate.

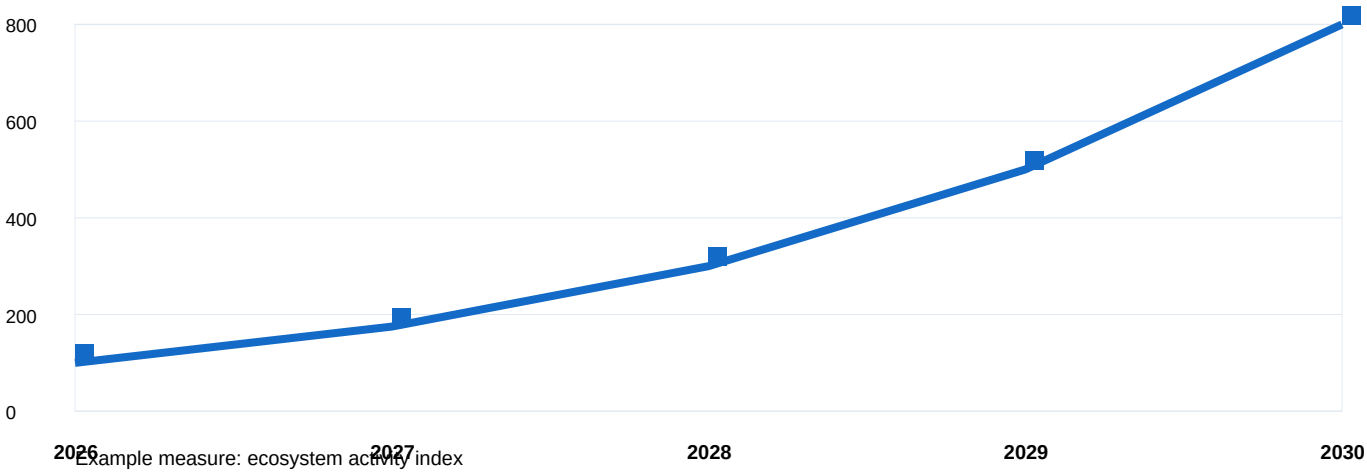
Phase 5 - Scale

Prioritize countries, categories and services using real product data.

Trust priorities: security, transparent fees, fraud controls, compliance review
and honest communication about what is live versus planned.

Illustrative ecosystem growth scenario

Index: 2026 = 100. Scenario values are planning examples, not measured data or forecasts.



Example measure: ecosystem activity index

10. GBK NORTH STAR

HOLDERS -> USERS -> FOUNDERS -> MERCHANTS -> AI MARKETPLACE -

Success should be measured through useful activity

active wallets | repeat users | successful swaps | liquidity | verified merchants
marketplace requests | completed connections | Learn users | Agri users
founder activity | content engagement | support quality

Future objective

Build a useful, trusted and scalable ecosystem where GBK connects to real digital products, services, businesses and communities.

This guide contains strategic directions and illustrative targets.
It does not guarantee token rewards, token price, profits, user numbers, merchant adoption or future product availability.

Verify current rules and product status on official GBK applications.

Illustrative ecosystem growth scenario

Index: 2026 = 100. Scenario values are planning examples, not measured data or forecasts.
